WHY NOW

24 million companies. One tax reform. Too few specialists.

Brazil, 2026–2033: every price, invoice and contract must be recalculated — and the clock is already running.

THE PROBLEM

Three places where companies lose money

1 document

One expired or late paper eliminates a multi-million bid

5,570 cities

Each one with its own service-tax rules and rates

2026–2033

Tax reform: every price and invoice must be rechecked

Today all of this is checked by hand, when there is time.

REAL CASE

An invoice from Maceió

Official rate **2%**

BUSINESS VALUE

More revenue. Protected margin. Lower cost.

↑ Revenue

Fewer disqualified bids. Competitive prices, calculated fast.

◆ Margin

The right tax inside the price — before you sell, not after.

↓ Cost

Hours of analysis become seconds or minutes.

Measured, not promised. Every answer cites the law — the professional has the final word.

Decision-support tool. Results vary by case; final review by a qualified professional.

WHO WINS

One tool, two winners

The company

- ✔ Knows the real tax in every price
- ✔ Wins more tenders, loses less margin
- ✔ Keeps its own accountant

Vyson

The accountant

- ✔ Calculation + law, ready to review and sign
- ✔ Serves more clients, with less risk
- ✔ Specialist-level answers in seconds

Vyson doesn't replace the accountant — it equips both sides.

VYSON CALC & NEGÓCIOS

Thank you! It is an honor to be here.

Presenting Vyson Calc & Negócios at this international event makes me very proud. Thank you so much for the opportunity — I hope to be among the finalists and winners!

I am passionate about automation, creativity and building tools that help people be more productive, whatever the need. My goal is for everyone to have access to complete, precise and trustworthy tools. As a Software Engineering student, I bring accounting, law and technology together to do it. Code written with Claude Code as an AI pair programmer under my direction.
