Accountant, court-appointed expert, specialist in Tax Law and Judicial Calculations · Software Engineering student · Vyson Fyconsult

THE PROBLEM

One invoice error or one missing paper costs a lot

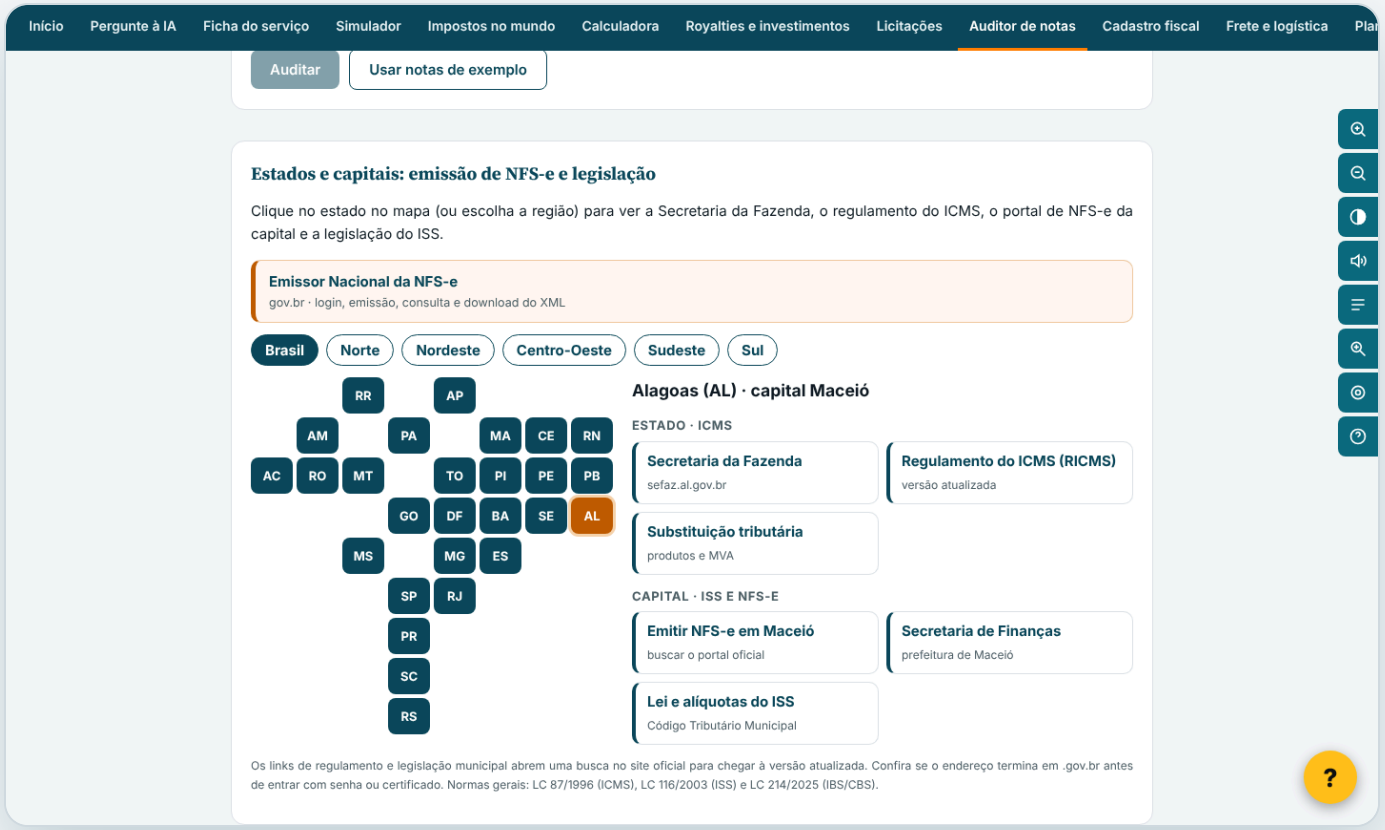

5,570
municipalities, each with its own service-tax rates and codes

Fines
repeated errors over months shrink profit and margin

Wrong price & marketing
a miscalculated tax spreads into sales and ad campaigns: it hits profit and financial health and can speed up a company's decline

Lost contract
one expired certificate disqualifies the bid

Tax reform
IBS/CBS from 2026 to 2033 and laws changing all the time

The site's map: invoicing rules and legislation by state and capital · Click here to see more →

THE IMPACT

One wrong percentage can cost millions

Million-dollar campaign, wrong price

a tax rate that was never validated goes into the price of an entire ad campaign: the loss multiplies with every sale

Tax reform until 2033

Brazil's IBS and CBS change prices nationwide and affect imports, exports and agreements with every country that trades with Brazil; other countries are also rolling out VAT and e-invoicing

Small businesses

many close because they cannot build a sale price with the right taxes

Contracts and tenders

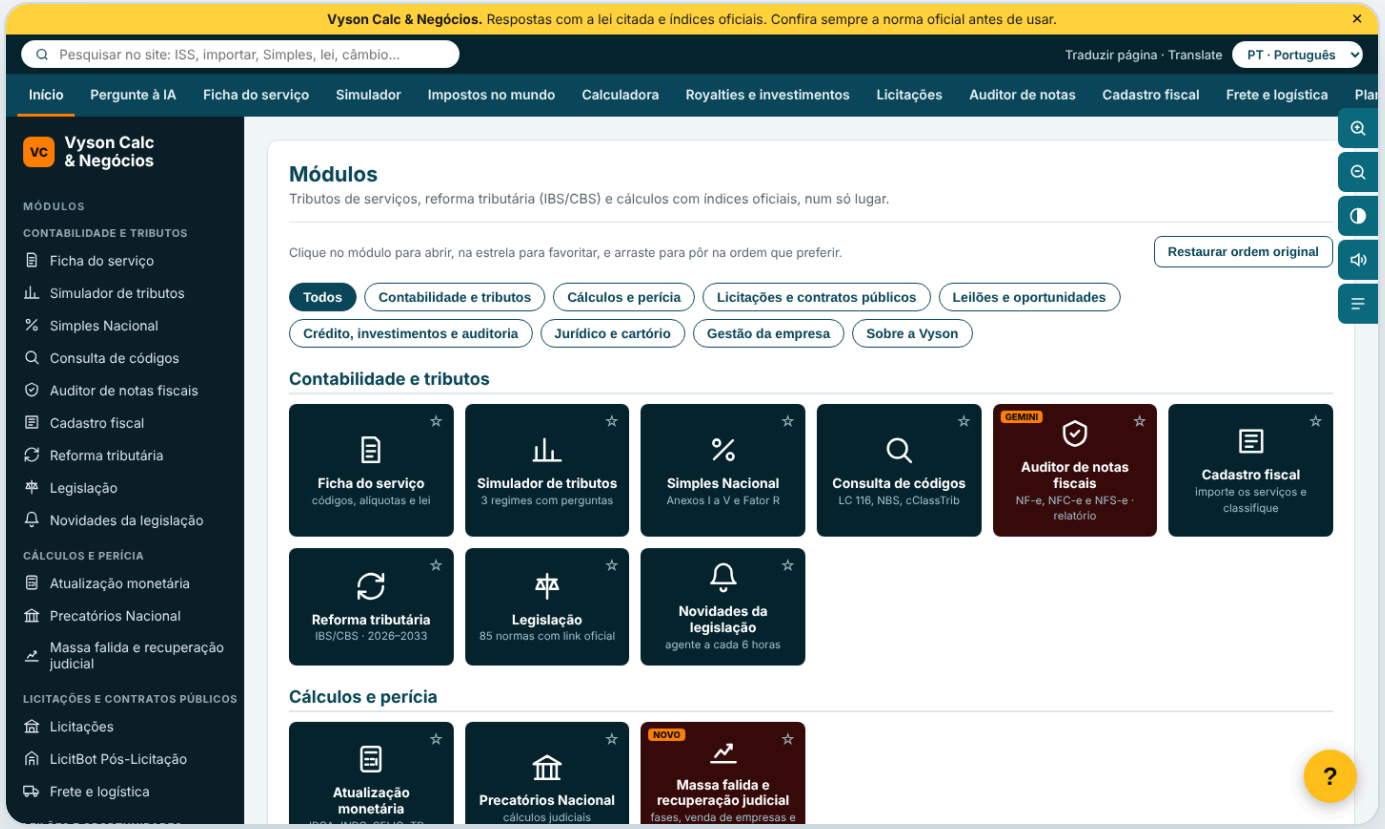

million-dollar contracts are lost over one wrong document or calculation, for lack of information

The answer: an audit report that points out the error, cites the law and guides the fix in time, before the sale, the campaign or the bid.

THE SOLUTION

Vyson Calc & Negócios: a team of agents

- **Coordinator:** Gemma 4, an open model on AMD, decides which agents to call
- **Official rules compute** (LC 116, 906 Maceió codes, 410 São Paulo codes); the AI explains
- **Citation gate:** any claim without an official source is rejected
- Invoices · public tenders · monthly taxes · UAE VAT · India GST

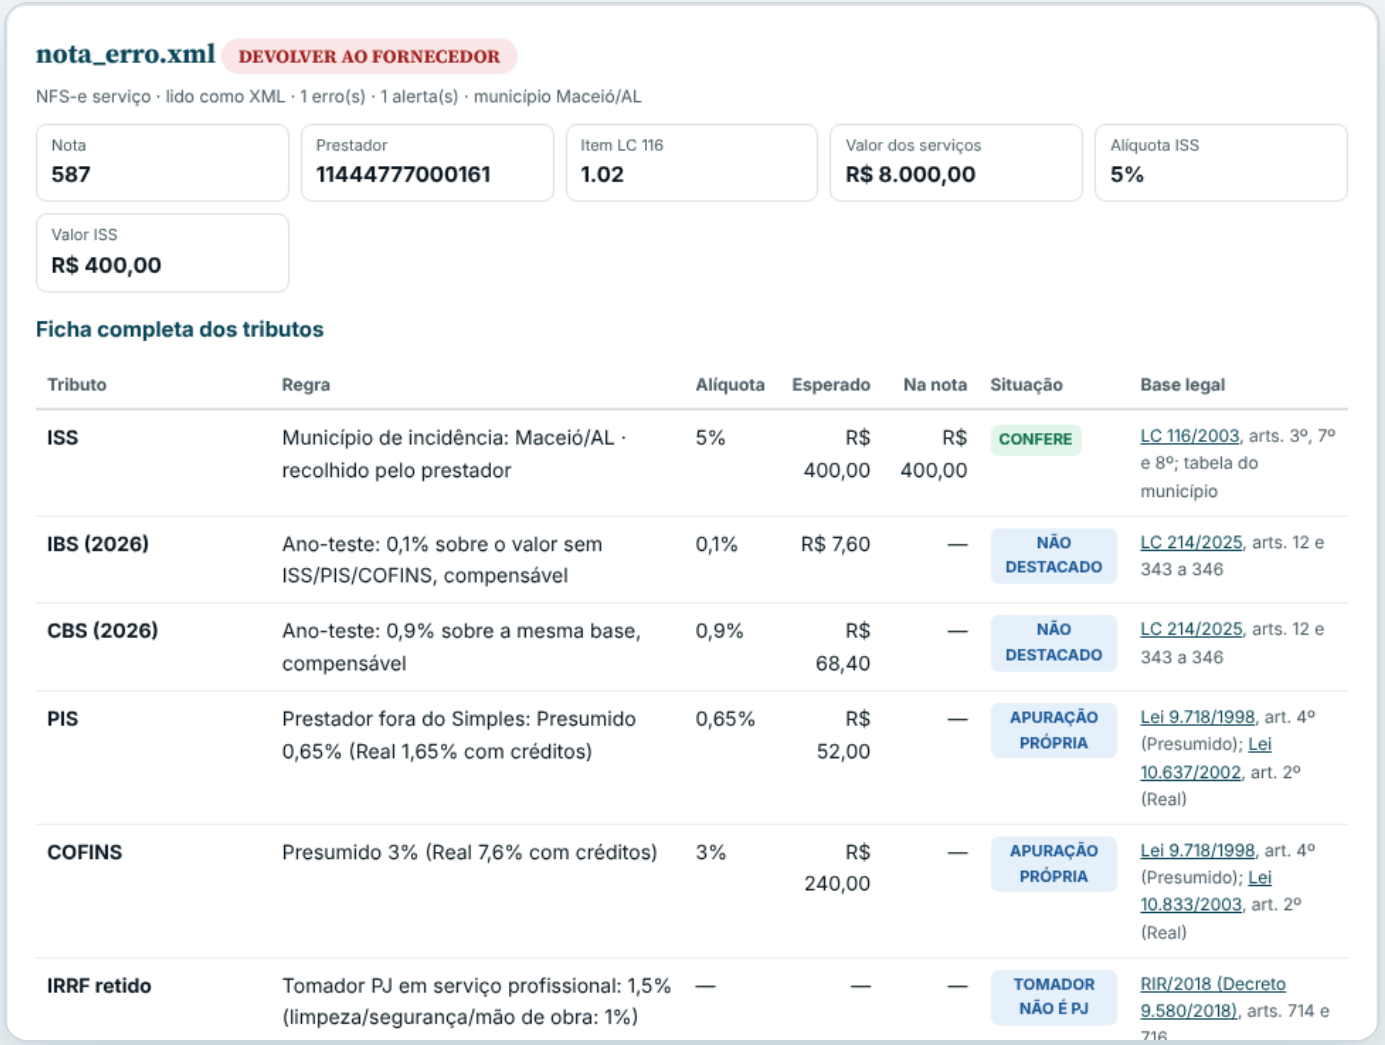

Home page: modules in 8 groups · Click here to see more →

DEMO

Invoice with an error: return to supplier

- Tax charged at **5%**; Maceió's official rate for software is **2%**
- Full tax sheet with the **legal basis and link**
- Supplier e-mail ready · report in Word and PDF

RUNS ON AMD · AMD

Gemma 4 decides on its own which agents to call

- Extractor → service-tax auditor → tax ID → case law → legal → communicator
- 4 calls on AMD: **1.41 · 2.88 · 2.72 · 4.58 s**
- Opinion written by the AI, citing only what the agents found
- **Stack:** Python and JavaScript · Gemma 4 on vLLM + ROCm (AMD) · tool-calling agents · Vercel · GitHub Actions

Real invoice with tax IDs blurred (professional secrecy) · Click here to see more →

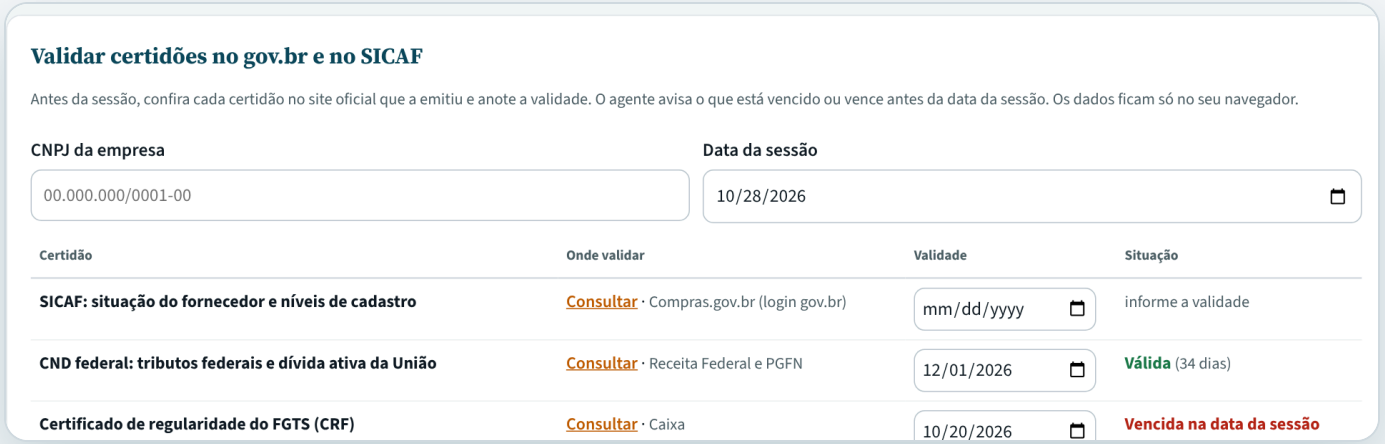

PUBLIC TENDERS

Paperwork created, validated and checked against the notice

- Reads the notice: requirements, deadlines and risks
- Generates **30+ documents on letterhead**, filled with the company's data, in minutes: declarations, power of attorney, proposal with the regime's taxes
- Checks every certificate **on the session date**, with legal basis and official link
- Verdict: **ready** or **not ready** to bid · registration and strategy guidance in the chat

Full tender cycle on the site · Click here to see more →

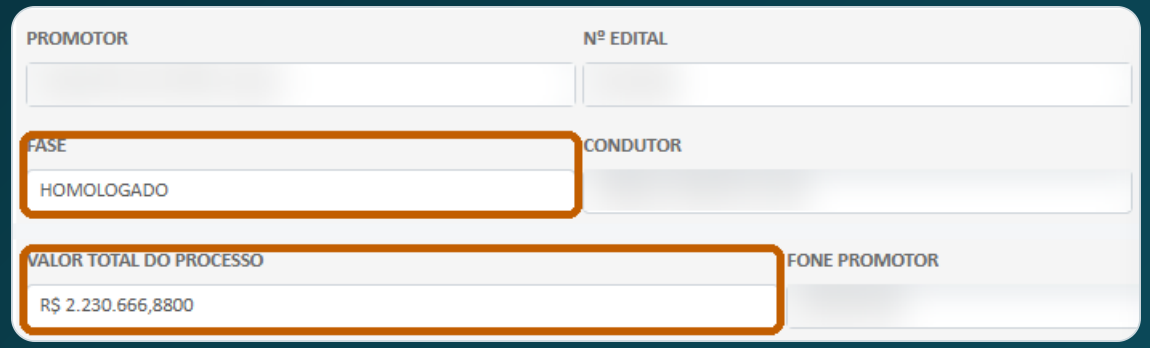

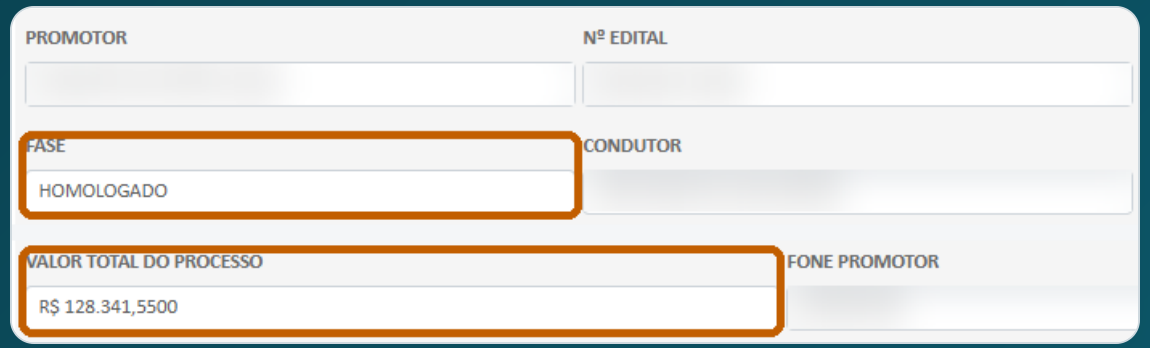

Certificates checked on gov.br and SICAF · Click here to see more →

REAL-WORLD VALIDATION

Contracts closed: 2 tenders awarded

R$ 2.36 million

Using the tender agent's method. Client and agency names blurred (professional secrecy).

REVENUE

The more precise, the more the company grows with financial security

Win contracts

complete paperwork, valid on the session date: R$ 2.36M already awarded

Protect margin

the right tax in the sale price, the bid and the campaigns

Avoid losses

fines, double-paid tax and missed withholdings caught before payment

Scale

260 invoices checked in under 1 s; the team handles the exceptions

TESTED AND VALIDATED

Measured numbers, not promises

203/250

planted errors caught: tax rate, service tax, UAE VAT, expired certificate, wrong tax ID, missing document

0

false alarms on 70 clean documents

27/30

correct official sources on the frozen (SHA-256) set of 30 real questions

< 1 s

to check 260 invoices by rules; by hand, hours or days

Honest limit: the gate checks the source, it does not guarantee every conclusion is right. That is why a person reviews.

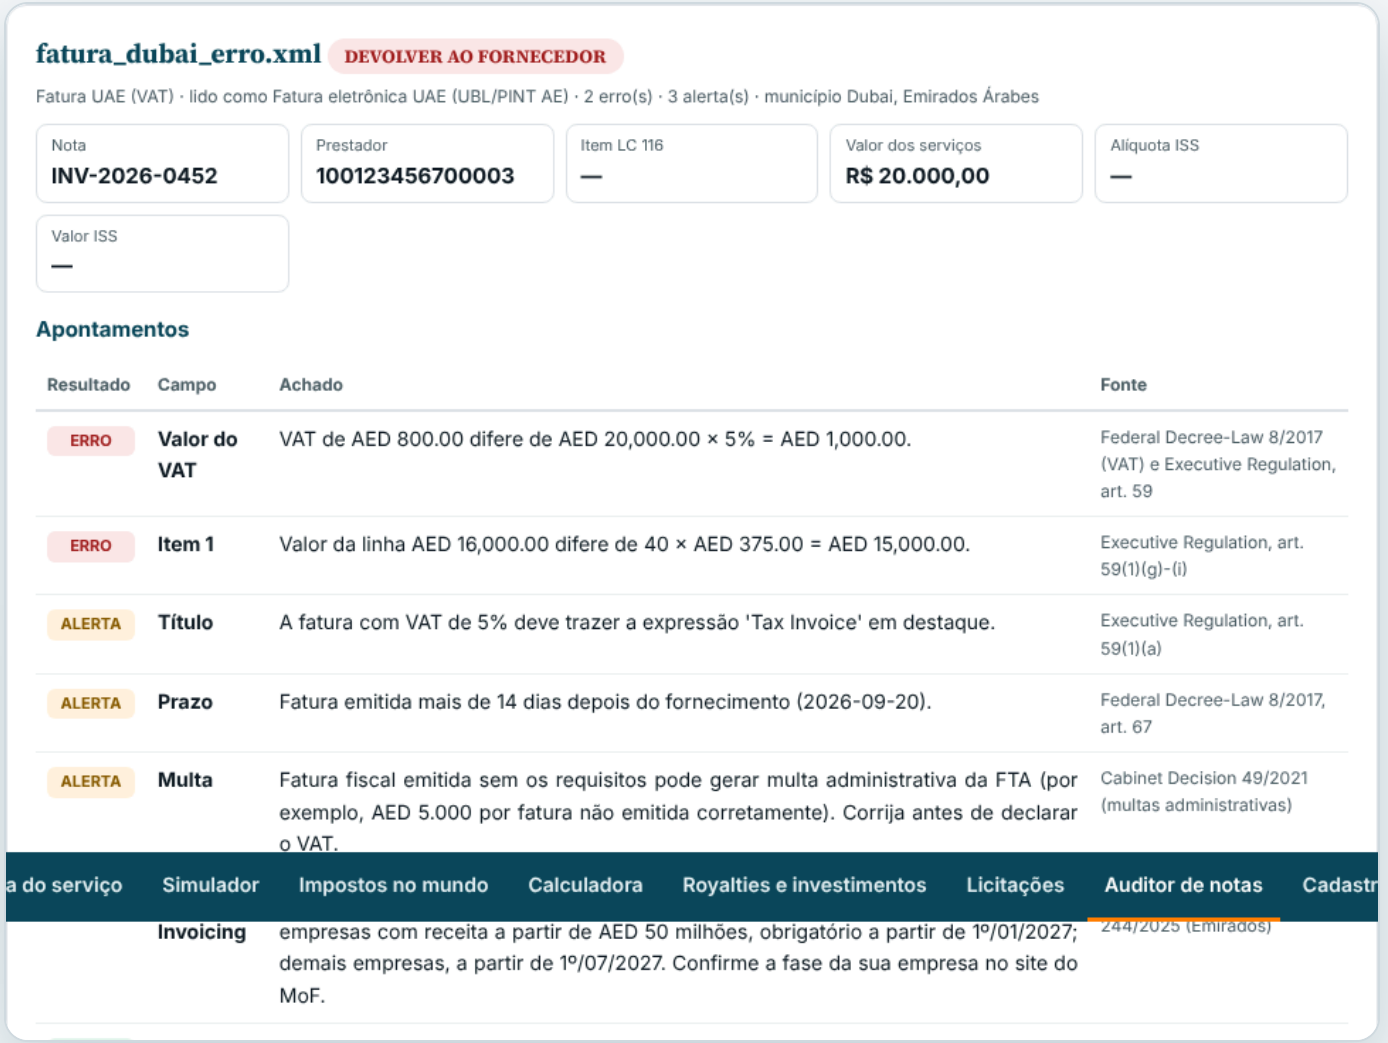

The same team audits the UAE and India

- UAE: TRN, 5% VAT, mandatory fields (art. 59), 14-day rule, reverse charge, PINT AE
- India: GSTIN, CGST + SGST or IGST, GST 2.0
- Validated, translated paperwork: Portuguese and other languages (the site already serves 7) to bid on international platforms such as SAP Ariba and government procurement portals
- New country = new rules module + official table

Portais oficiais onde governos e grandes empresas publicam compras. Fornecedor brasileiro pode participar de muitos deles; a regra de cada país diz quais documentos e cadastro são exigidos.

Onde	Portal oficial	O que tem e como entrar
Empresas privadas (SAP Ariba)	SAP Business Network Discovery (Ariba Discovery)	Oportunidades públicas de grandes empresas no mundo todo. Crie a conta gratuita de fornecedor, cadastre suas categorias e receba os convites; para responder, use o agente do Ariba no Vyson Auditor.
Dubai	Dubai eSupply	Compras do Governo de Dubai. Cadastro do fornecedor no portal; normalmente exige licença comercial nos Emirados ou parceiro local.
Abu Dhabi	Abu Dhabi Government Procurement Gate	Compras do Governo de Abu Dhabi, com registro de fornecedor.
Emirados (federal)	Ministério das Finanças: compras federais	Compras dos órgãos federais dos Emirados pela plataforma digital do Ministério das Finanças.
Índia	GeM · CPPP	GeM: marketplace do governo para bens e serviços. CPPP: editais dos órgãos centrais. Exige certificado digital indiano para assinar propostas.
Estados Unidos	SAM.gov	Todas as compras federais. Registro gratuito com o número UEI; empresa estrangeira também pode se registrar.
União Europeia (França, Itália, Alemanha)	TED: Tenders Electronic Daily	Diário oficial de licitações da UE acima dos valores europeus; aberto a fornecedores de fora da UE conforme o acordo de compras da OMC.
França	BOAMP	Boletim oficial das compras públicas francesas.

UAE invoice with errors (fictitious) · Click here to see more →

WHY IT WINS

What only we have

Real validation
R$ 2.36M in awarded contracts

Law cited
every decision with the norm and official link

AI never computes tax
official tables do

Secrecy
tax IDs and names masked, SHA-256 receipt

Expert-built
accountant and court expert; trained the team that cleared the TJAL calculation backlog in 2025

Measured on AMD
Gemma 4 coordinating agents, timed

FOR INVESTORS

Profitability and scale

Huge market

millions of Brazilian companies issue and receive invoices; UAE e-invoicing mandatory from 2027

Real traction

R$ 2.36M in awarded contracts with the method; live site auditing real invoices

Low marginal cost

260 invoices in under 1 s by rules; AI on AMD only where it adds value (≈10 s per invoice)

Replicable

new country or city = new rules module + official table; same agent team

Recurring revenue

subscription by document volume plus custom projects (tailored bot and site)

Paying customers

accounting firms, corporate tax teams and bidders: the pain is money

ABOUT THE FOUNDER

Tatiana Tenório Martins

Judicial accountant · forensic accountant · auditor · specialist in Tax Law, court-ordered debts and judicial calculations

See the full profile on LinkedIn → · ORCID · GitHub

12+ years

public and private accounting, auditing, forensic work, judicial and tax calculations

TJAL · Court accounting

since 2022; trained 30+ people in the task force that cleared the calculation backlog (2025); 10+ manuals and automated spreadsheets

CNJ 2026

speaker at Brazil's National Public Hearing on court-ordered debts, the only one from Alagoas

Auditor

the only person from Alagoas to pass the CFC Auditor Exam (2017) · active CRC/AL · National Registry of Experts

Education

MBA in Tax Accounting and Tax Law (IPOG) · postgraduate in Business Administration (FAN/FGV) · BSc Accounting · Software Engineering (in progress)

Teacher and founder

lecturer at ESMAL (judicial school) · founder & CEO of Vyson Fyconsult · recognition from the State Inspectorate of Justice (2024)

VYSON CALC & NEGÓCIOS

Thank you! It is an honor to be here.

Presenting Vyson Calc & Negócios at this international event makes me very proud. Thank you so much for the opportunity — I hope to be among the finalists and winners!

I am passionate about automation, creativity and building tools that help people be more productive, whatever the need. My goal is for everyone to have access to complete, precise and trustworthy tools. As a Software Engineering student, I bring accounting, law and technology together to do it. Code written with Claude Code as an AI pair programmer under my direction.
